

ABOUT ME

Proactive, self-taught, creative, and detail-oriented. After learning web development in 2020, I continued my path as a front-end developer with solid back-end knowledge. Passionate about everything I do and always eager to keep learning and growing as a full-stack professional.

MARCOS LAVARELLO

FRONT-END DEVELOPER WITH A FOCUS ON BACK-END

EXPERIENCE

FREELANCE DEVELOPER

Self employee | March 2024 - Current

- Developed high-converting landing pages integrated with payment gateways using Mercado Pago and Stripe APIs, with a custom JavaScript backend.
- Designed and built institutional websites for clients in logistics, HR, and service industries using modern frameworks like Astro and Next.js.
- Delivered end-to-end solutions, from front-end UI implementation to back-end logic and API integrations.
- Focused on performance, responsive design, and clean code to ensure scalable and maintainable web products.

WEB DEVELOPER

Cyberclick | March 2024 - Current

- Development of custom websites with a strong focus on performance, scalability, and clean, maintainable code.
- Maintenance and optimization of corporate websites, including feature updates, bug fixes, and performance tuning.
- Integration with external and internal APIs to enable dynamic content, automation, and third-party services.
- Management and utilization of HubDB for structured content delivery within HubSpot-based websites.
- Custom theme development in HubSpot CMS using Hubl (Jinja-based), JavaScript, and Python.
- Implementation of front-end solutions using HTML, CSS, JavaScript, React, and Node.js.
- Customization and technical setup of Shopify stores, including theme configuration and feature development.
- Advanced use of HubSpot CMS for building reusable modules, landing pages, blogs, and complete marketing websites.

DIGITAL PRODUCER

EY | November 2021 - March 2024

- Developed internal web applications aimed at improving internal processes and content management, using HTML, CSS, and JavaScript.
- Participated in the creation of key tools such as the Discover Migration Tool, Content Delivery Management Tool, and PMO Submission Tool, designed to streamline workflows and standardize processes.
- Applied UX/UI principles to projects focused on usability and user efficiency, prioritizing clean interfaces, intuitive navigation, and consistent user experiences.
- Utilized SharePoint tables as a database to structure and manage data within internal applications.
- Integrated APIs (such as the SharePoint API) to connect data sources, automate tasks, and enhance functionality within internal platforms.
- Performed QA testing across various portfolios (Discover, Atlas, and GBB), ensuring functionality, quality, and consistency across different environments.
